ELECTRIC SERVICE CONFIRMATION

DATE: _____

CUSTOMER NAME: _____

KILN MODEL: _____

VOLTS: _____

PHASE: _____

AUTHORIZED SIGNATURE _____

PRINTED NAME _____

In order to provide you with a kiln that works at your facility we must know the voltage and phase at your location. Please take the time to understand what these specifications are and find out from qualified personnel what the correct service is. Remember, if you order the wrong voltage and/or phase the kiln will not work and Sheffield Pottery, Inc. can not be held responsible. The average cost to correct a kiln that was ordered wrong is \$500. A 220 VOLT SPECIFICATION IS NOT SUFFICIENT.
